*Ultra-fast charging using a 350kw charging station IONIQ 6 can charge from 10-80% in as little as 18-36 minutes. Actual time will vary and is dependent on a number of factors including battery temperature, condition and age, ambient temperature and the power provided by the charger. Charge time increases in cold weather and if battery temperature activates safeguarding technology. Ultra-fast chargers are currently available on selected motorways/major arterial routes – see the Charge myHyundai app or [chargemyhyundai.com/web/hyundai-gb/map](https://www.hyundai.co.uk/charge-my-hyundai) for details. Ultra-fast chargers are not available in Northern Ireland.
